Biscayne Beach Sewer Air Valve Replacements

Project Advisory: Saturday, February 4 & 11, 2023

What's Happening

The City of Miami Beach Public Works Operations Division will be replacing valves along the sewer system in the areas shown in the attached image.

Work will be completed in two phases:

Phase one includes Hawthorne Avenue from 81 to 77 street and the western end of 75 Street.

Phase two includes Dickens Avenue from 75 to 73 street and 73 Street from Dickens to Harding Avenue.

Work is scheduled to take place over the weekend with Phase one starting on Saturday, February 4, and Phase two on Saturday, February 11. Working hours are from 7:30 AM to 7 PM and each phase is expected to have a duration of 2 to 3 days, with the schedule subject to change. During this time some lane closures will take place along the corridors shown.

Limited noise levels can be expected in the area due to the equipment and tools needed for the maintenance work to take place. Please expect to see an increased level of activities in the area by city Public Works personnel.
