75 Street Sewer Pump Station Project Advisory

Project Advisory: Monday, February 13, 2023

What's Happening

The City of Miami Beach Public Works Operations Division will be performing maintenance work at the Sewer Pump Station located at the Public Works facility at 75 Street and Dickens Avenue. All work will take place within the limits of the facility.

Work is scheduled to commence on February 13, 2023, and will take place Monday-Friday between the hours of 7:30 AM to 7 PM. Work is estimated to have a duration of approximately 3 weeks.

Limited noise levels can be expected in the area due to the installation of by-pass pumping equipment and tools needed for the maintenance work to take place. Please expect to see an increased level of activities in the area by city Public Works personnel.
