

Don't Grease the Street

IT ALL DRAINS TO THE BAY

Proper disposal of grease, oil and cleaning liquids is crucial. Washing kitchen mats and equipment in alleys, as well as having unkept trash rooms, result in grease, oil and chemicals flowing into storm drains, which ultimately drain into Biscayne Bay — harming water quality and marine life.

Restaurant owners and operators that engage in these practices risk receiving two (2) violation notices with fines from the Code Compliance Department.

As pursuant to Sections 90-101, 90-36:

First Offense: \$1,000

Second and Subsequent Offenses: \$2,000

As pursuant to Section 46-234(a):

First Offense: \$500 plus cleanup fees

Second Offense*: \$1,000 plus cleanup fees

Third or Subsequent Offenses*: \$5,000 plus cleanup fees

*Within 12 months of first offense

To prevent pollutants from reaching Biscayne Bay or the ocean, always clean mats and equipment over your kitchen drain, ensuring that grease flows directly into grease traps for proper disposal.
