Coming Soon!

WHAT IS IT?

The City of Miami Beach is developing a competitive grant program for Miami Beach property owners. This program will support property owners in assessing their flood risk and making flood mitigation improvements to their own properties

through a **50/50 matching grant, with up to \$20,000** available per property. No match will be required for low to moderate income properties. Only proposed projects that directly address flooding mitigation will be funded.

TWO PHASES

Phase 1: Assessment & Testing Spring 2022

Property owners first apply for a flood mitigation and sea level rise resilience assessment, which will evaluate the property's current and future flood risk and identify possible improvements.

Expected process

- 1) Application expected to open in Spring 2022
- 2) Owner responsible for obtaining Elevation Certificate
- 3) Completed assessment will qualify property owners to apply for Phase 2

Phase 2: Improvements 2023

Property owners can apply to be selected for funding to carry out the improvements identified in their assessment.

Types of Improvements

- | Green Infrastructure | Building Flood Mitigation |
|---|---|
| <ul style="list-style-type: none">• Bioswales• Rain Gardens• Permeable Surfaces• And more! | <ul style="list-style-type: none">• Wet/Dry Floodproofing• Appliance Elevation• Seawall Elevation• And more! |
